

**\*Assumption 1 :** You have a valid Konectible account with a valid Polygon-based Wallet and Private Key

**\*Assumption 2 :** You have claimed or purchased NFTs on Konectible, and the tokens are listed under the “My NFT” page

**1. Login to your Konectible account -> From User Profile page -> Click Edit**

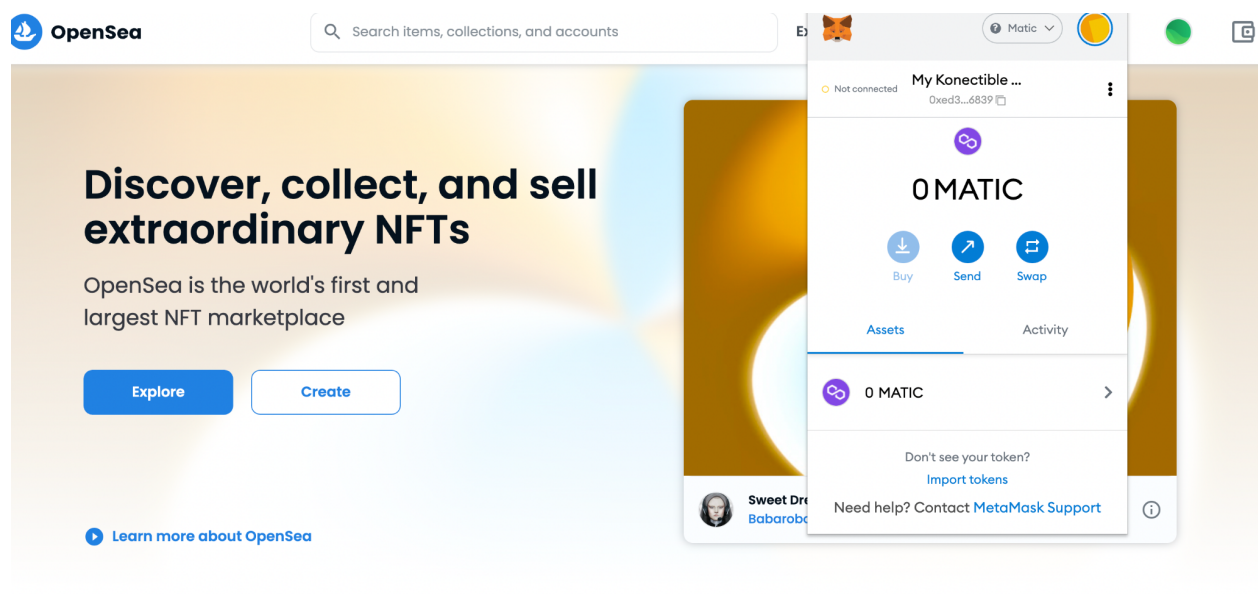

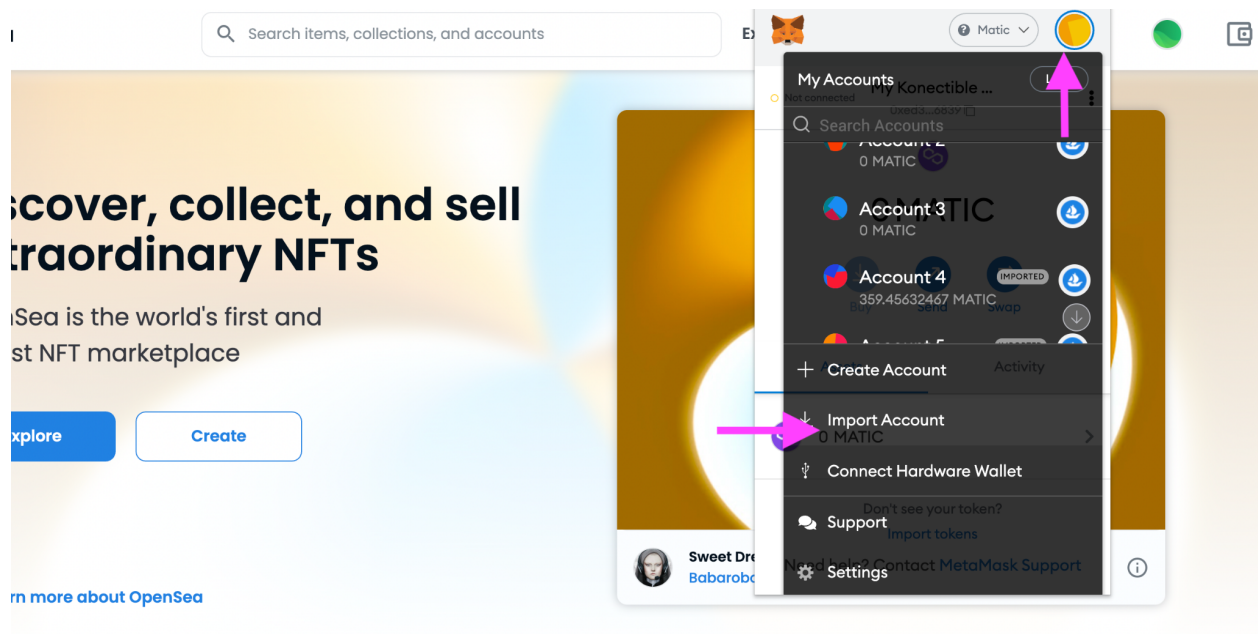

2. Scroll down to find your Wallet address and Private Key -> Click the Copy & Paste icon to capture both your address and private key -> Save both to a secure location

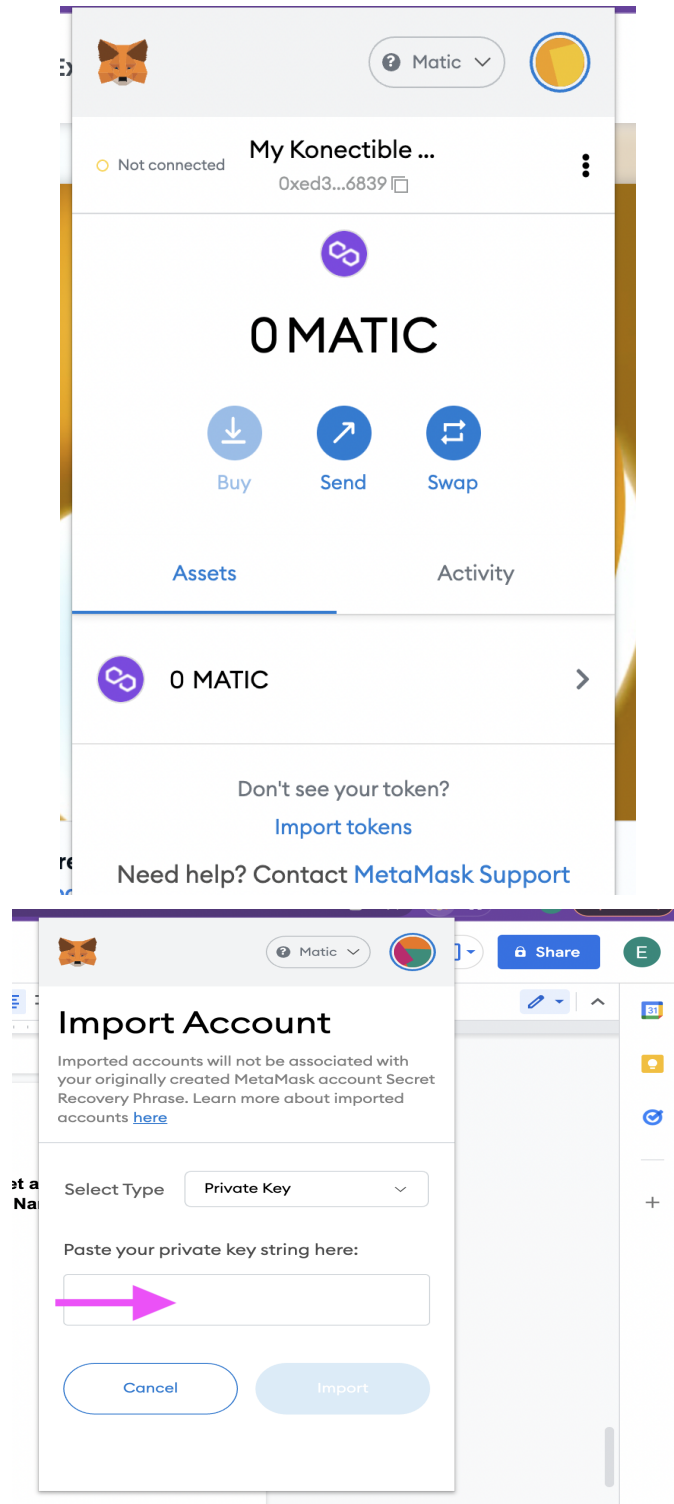

### 3. Import your Konectible wallet address on your MetaMask browser extension

Click on the MetaMask fox icon -> ensure you are connected to the Matic Network -> Click top-right Accounts dropdown menu -> select "Import Account"

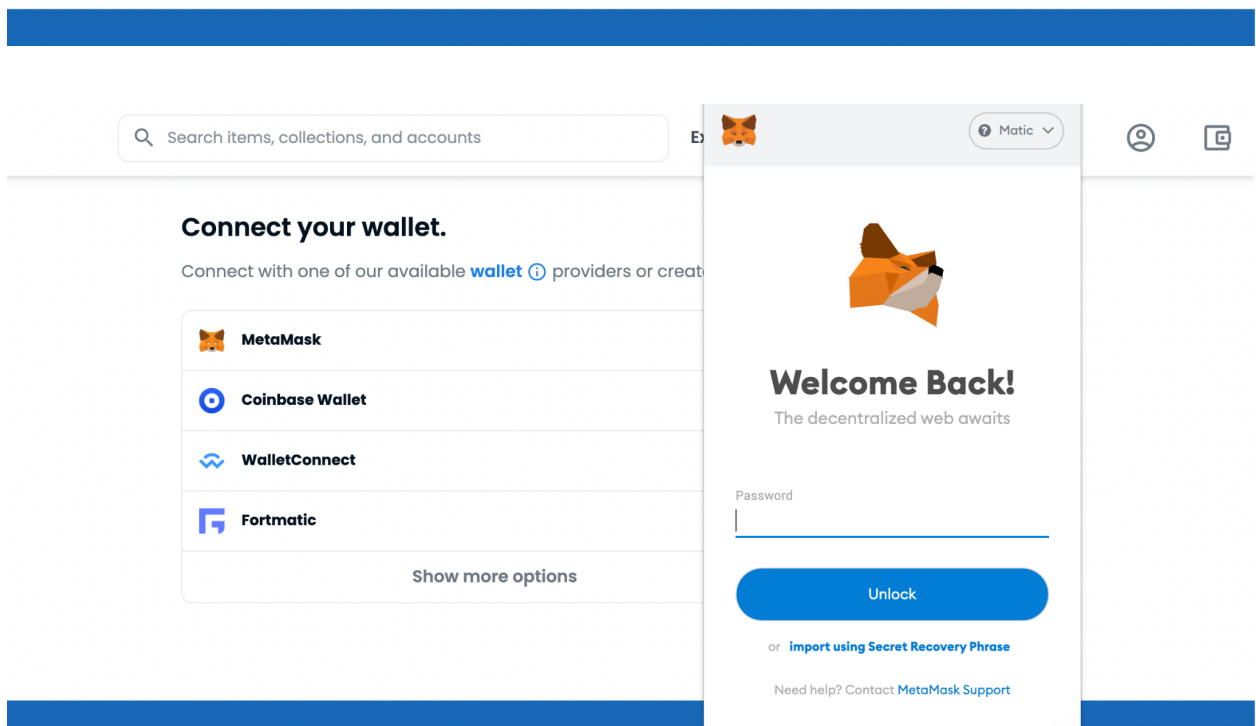

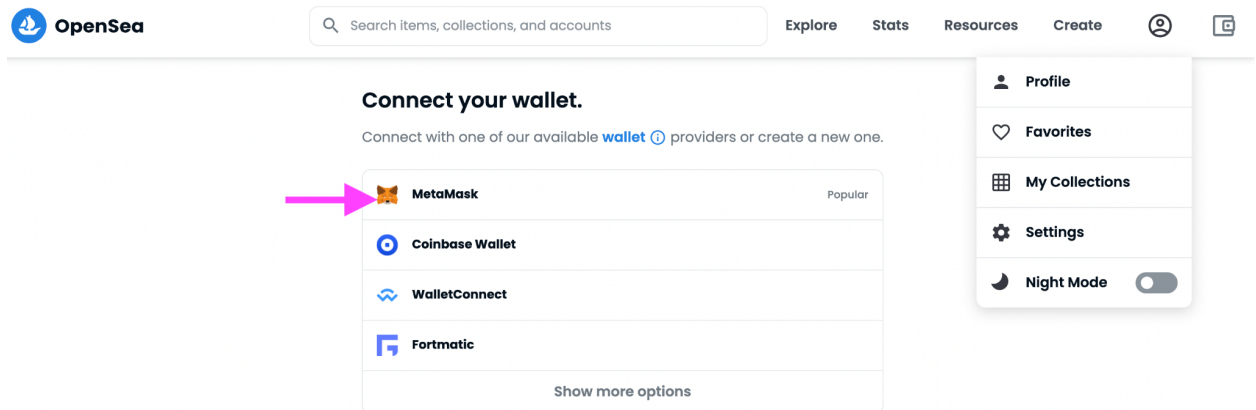

4. Now insert the Private Key you captured from CFNT.us in step #2 -> If private key is valid, you will have successfully imported your wallet address into MetaMask -> ensure the Wallet Address is the same

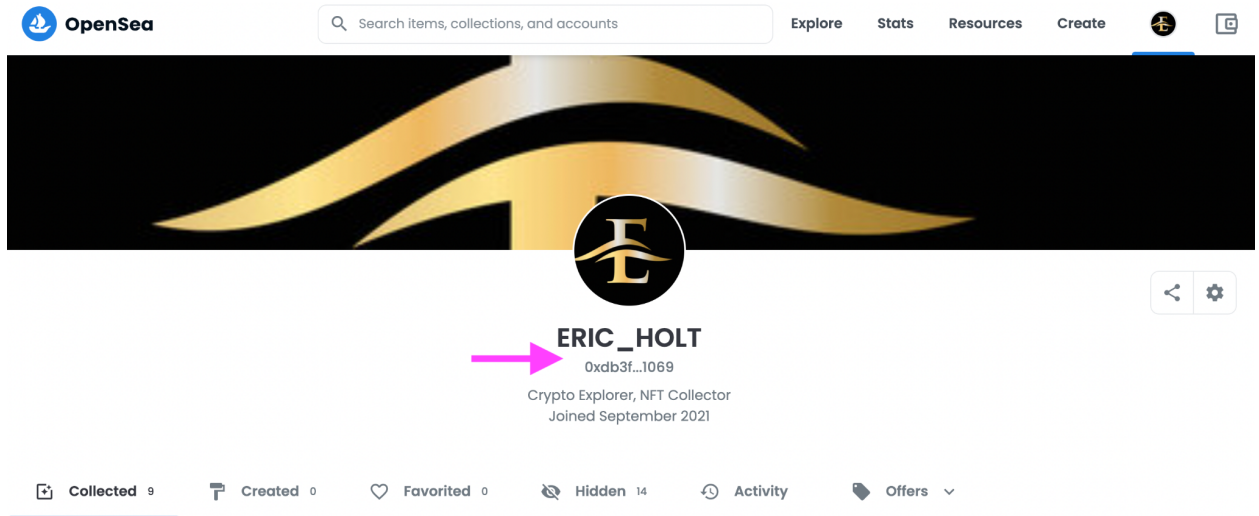

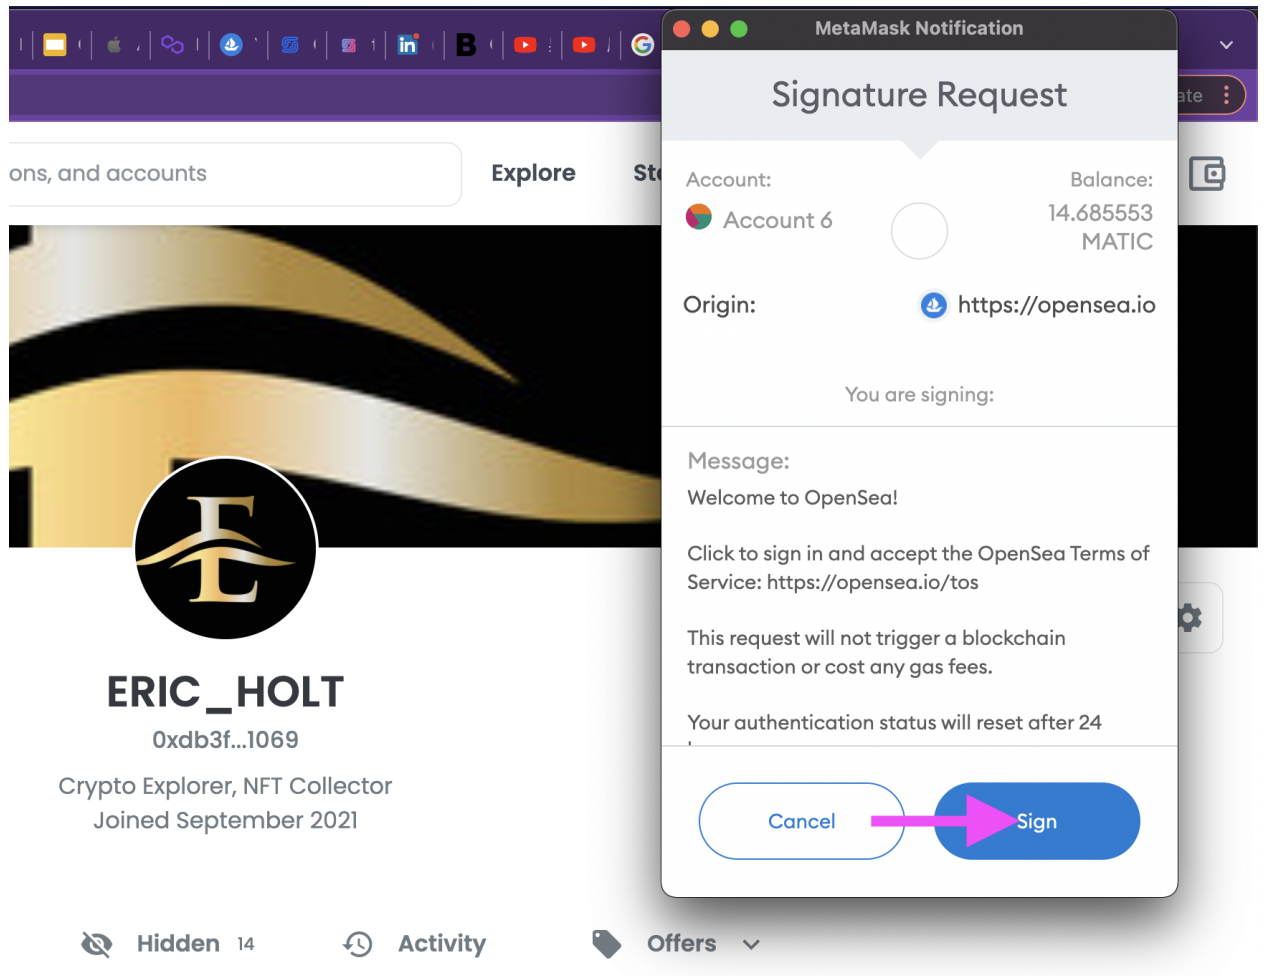

5. Open a new browser window with URL = “ <https://opensea.io> “  
-> click on top right User Icon -> You will be prompted to “Connect your Wallet” -> select MetaMask -> You may be prompted to login to your Metamask account with your password

6. Ensure the Wallet Address shown on your OpenSea.io Profile Page is same as that captured from your Konectible account

7. Click Top right user icon to expand dropdown menu -> click “Settings” -> You may be prompted by MetaMask to “Sign” in order to confirm and validate this action :

8. From Settings Page -> define a custom user name, enter description, provide email address -> Wallet Address field is pre-filled and please double-check address is correct

Profile Banner 

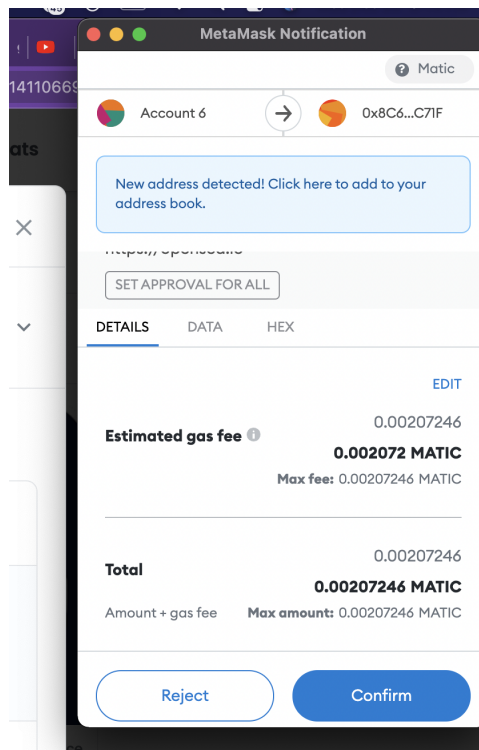

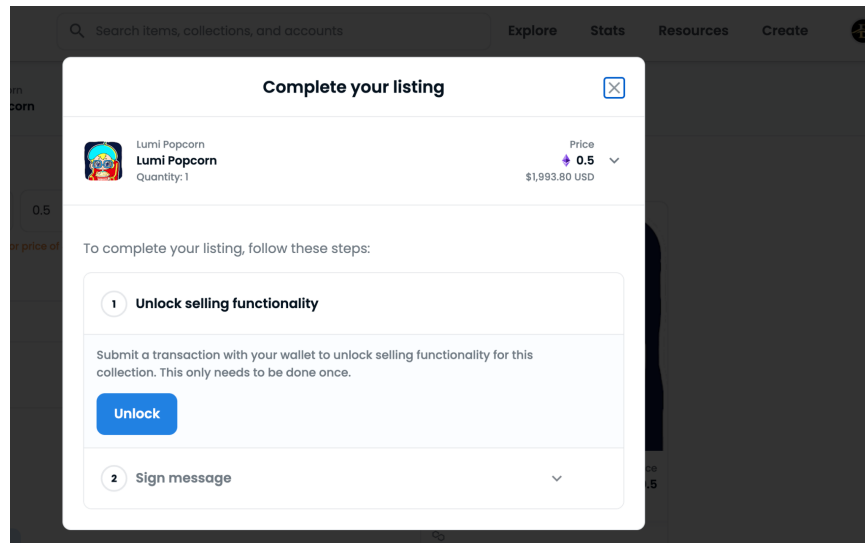

9. Return to your OpenSea.io Profile Page -> By default all your claimed and purchased NFT tokens will be listed under the “Hidden” tab -> Click the “...” on each NFT tile and select “Unhide” to move your NFT into the “Collected” tab to be shown and listed publicly

10. Click on any NFTs to the Details Page -> click right top Sell button -> Set your price in ETH and click “Complete Listing”

11. Proceed to click “Unlock” as a one-time action to unlock selling -> Sign message to confirm -> this transaction will require a certain amount of MATIC so please ensure there is sufficient MATIC balance in your wallet

**12. If transaction is completed successfully, you will be prompted with the popup as followed and your NFT token is now good for sale ! -> promote this NFT by sharing weblink to your social platforms !**
